EXHIBITION DIRECTORY

AUSTRALIAN WINE INDUSTRY
Technical Conference & Trade Exhibition
EXPO OPENING HOURS
Monday 25 July 12pm – 6pm
Tuesday 26 July 10am – 6pm
Wednesday 27 July 10am – 4pm

VENUE:
Adelaide Convention Centre
South Australia

ADMISSION:
Admission is free for trade personnel, it is a condition of entry that all trade visitors are pre-registered or complete a registration form onsite.

VISITING:
Students and Children
Students and children under the age of 16 will not be admitted unless accompanied by an adult or by prior arrangement with Fair Events.

Servicentre
The Fair Events Servicentre is located at the entrance of the exhibition, in the foyer area F.

Dining and Refreshments
Food and beverage outlets are conveniently located in the exhibition and will be open the duration of the exhibition.

Canvassing
Canvassing for business by any unauthorised persons is strictly prohibited. The display and distribution of printed or other material by non-exhibitors is prohibited.

Parking
There are two undercover parking options with the North Terrace and Riverbank carparks. Both are located directly under the Centre and are open 24 hours a day, 7 days a week.

Security
Uniformed security guards will be on duty for the duration of the exhibition, including move-in and move-out periods. The venue is also under constant surveillance.

Points to remember when visiting AWITE 2016:
• Your name badge must be worn at all times to move freely through the halls
• If visiting the exhibition with more than one person, plan a meeting point as the PA system cannot be used to page people
• Taking of photographs and videos in the halls and foyer area is prohibited, unless permission is granted by the exhibitor.
• Smoking inside the venue is not permitted

Welcome Letter

Welcome to AWITE 2016

The only thing certain in today's business environment is change and those companies and individuals who are prepared to adapt and adopt change are proving to be the winners in a competitive marketplace.

Back in South Australia after six years this year's Australian Wine Industry Trade Conference and Exhibition has so many new products and fresh thinking it's a must attend for any wine industry professional. The leading industry suppliers are represented providing the latest solutions from growing through to distribution and everything in-between.

At the conference visitors will engage with the latest industry trends and innovation, while at the AWITE you get face-to-face with expert suppliers and have a hands-on experience with their products. You get to see the latest offerings all together in one place within a relaxed environment.

It's an opportunity to network with peers with similar challenges.

I want to personally thank the AWITC Planning Committee who are so committed to delivering the best possible event for the industry and who have spent countless hours ensuring the industry can get together and challenge conventional thinking.

We hope you enjoy your time at AWITE. I am sure you will find something to help you change for a better future.

Thank you,

Gary Fitz-Roy
Managing Director
Fair Events

Welcome from the Chairman, 16th Australian Wine Industry Technical Conference and Trade Exhibition Planning Committee

On behalf of the Planning Committee, I am pleased to welcome you to our industry's premier event. The combination of the latest content and an extensive trade exhibition is a powerful one, and has been ever since the first AWITC and trade exhibition held in Mildura in 1970.

Significant extra efforts have been made this year to increase the integration between the conference and the trade exhibition. For the first time, exhibitors have been allocated registrations to attend the conference sessions. There will also be shared catering, and dedicated times for conference delegates to explore the exhibition.

A range of conference social events will take place in the trade exhibition space – including lunch and tea breaks, pop-up bars and the Tuesday night networking function. Follow @The_AWITC on Twitter, and use the hashtags #16AWITC and #AWITCSocial to keep in touch with what's going on.

It has been a pleasure to work with Fair Events on the staging of the exhibition. Fair Events has brought some fresh ideas to this year's event that are certain to pay off for exhibitors and visitors. Overall, signs are pointing to an increasingly positive sentiment across the Australian wine industry, with delegate numbers and exhibition sales well ahead of expectations. I am certain this will translate into visitor numbers and tangible benefits to your business from your presence at this event.

Thank you for your support of this event – I look forward to meeting you in the trade exhibition.

Dr Dan Johnson
Chairman, Planning Committee
16th Australian Wine Industry Technical Conference and Trade Exhibition
3M Purification is a long standing supplier to the Australian and New Zealand Wine Industries. 3M offers a complete range of products for a range of filtration processes from cellar and bottling line filtration through to export loading filtration. Our locally based engineering and design team makes it possible to create where necessary customised solutions to ensure that our products fit seamlessly with the needs of our customers. Our unique range of solutions and innovative award winning products are supported by our extensive technical sales force, based in all mainland states and New Zealand.

The John Family first settled in South Australia’s world renowned Barossa Valley in the 1840’s. Since then, five generations of the John family have continued an unbroken connection with the viticulture, winemaking and coopering industries within the Barossa Valley. They began operating coopers late in the 19th century when Christian Paul John established what, was then, the Chateau Tanunda Cooperage in 1889. His son Arthur Paul John (after whom the business is named) continued in his father’s trade, established the original AP John cooperage on the current Chateau Tanunda site from whence it traded until moving to the current site in Tanunda in 1925. Today the business is managed by fourth generation master cooper Peter John – great-grandson of the company founder.

Croplands manufacture and supply quality spray equipment, components and accessories. Croplands has been building sprayers since 1972. After operating for 40 years in the Australian and New Zealand environments we understand what the pressing problems are; before, during and after application. Our sprayers are built accordingly. We listen to farmers and produce cost effective solutions to suit their needs.
Della Toffola Pacific was launched in early 2010 to focus on the Australian, New Zealand and emerging Asian winery markets. Serving both large and small wineries and vineyards, as well as many other food/beverage producers, Della Toffola has over 50 years of experience in winemaking, food and beverage production equipment, packaging lines and stainless steel processing. The extensive Della Toffola winemaking equipment range includes crushers/destemmers, pumps, presses, fillers, labellers, flotation systems, filters, storage, stabilisation, refrigeration and fermentation equipment, as well as complete turnkey solutions.

Megazyme recently introduced The Megaquant Wave Chemistry Analyzer. It is a compact, economical, standalone photometer optimised for use in the wine industry. All of Megazyme’s wine test are pre-installed on the machine, offering ease of use for the analyst, on board instructions and automated calculation of results. Megazyme test kits are ideal for wine analysis because they have long shelf, rapid analysis times (often only a few minutes), simple formats and very competitive pricing. Megazyme also supplies kits for manual, microplate and auto-analyser formats. Available From Deltagen Australia. Contact Mike Watson, michaelw@deltagen.com.au 03 9728 3038.
Demptos

Barrels beyond compare

Independent at source
Rich in tradition
Evolved through research
Built by craftsmen
Chosen on trust

A unique, cooperage business, independent at source, founded in tradition, developed through research, built by craft and traded on trust. While our business is to understand the role, features and benefits that a crafted, technical barrel can play in the development of a fine wine, we are equally sure that the star of the show must always be the fruit. The choice of Demptos is an acknowledgement that provenance and site are the ultimate authors of world-class wine. Demptos: Barrels beyond compare.

Greenstream Systems Australia represents SJE Corporation of Korea and distributes their Optima Steamer range. The Optima Steamer is ideal for wine barrel cleaning and saving large amounts of water in the process. Steam is the future in cleaning and Greensteam Systems is proud to supply and maintain the Optima Steamer here in Australia. Not only used in wine barrel cleaning but all other aspects of cleaning around the winery and indeed other food and beverage applications. Steam at over 100 degrees celsius will kill brattanomyces and other yeast strains simply and quickly. The steam unit can also be attached to a bottling plant to steam pipework etc. The Optima steamer is the way forward for cleaning and water saving.

Seasol is a 100% liquid seaweed plant conditioner that provides a synergistic range of natural compounds, trace elements, alginates and carbohydrates from a blend of brown kelps. Our seaweed is not harvested from living stands but sustainably sourced from storm-post material collected from remote locations that are free from pollution. This ensures the highest possible quality and consistency in every drum.

Seasol is a plant stimulant used to boost plant metabolism. It is 100% soluble and can be applied either to the soil or the foliage. It is designed to provide benefits that complement your existing fertiliser programme.

**Production benefits:**

- Aids plant establishment and reduces transplant shock
- Stimulates root growth and enhances flowering
- Enhances soil microbial activity
- Increases tolerance to adverse environmental conditions

<table>
<thead>
<tr>
<th>Suggested Application Guidelines:</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Field sprays</strong> For all growing stages. For use with a good atomiser. Use warm water. <strong>6 l/ha</strong></td>
</tr>
<tr>
<td><strong>Bare root vineyard applications</strong> For all types of sprays, equipment, use the area normally covered by the vine to be treated has much more potential use. <strong>5 l/ha</strong></td>
</tr>
<tr>
<td><strong>Foliar sprays</strong> Use larger spray for lighter sprays. <strong>0.5 l/ha</strong></td>
</tr>
<tr>
<td><strong>Concentrate applications</strong> Your local supplier will supply the right amount of concentrate as per the size of the application. <strong>For 1000 l: 5 l</strong></td>
</tr>
</tbody>
</table>

NEW TURBO SCRAM SPRAYER

The Silvan Centrifugal Remote Air Module (SCRAM), combines the unparalleled coverage and water savings of Silvan’s Turbomiser technology, with the efficiency gains and safety advantages of a cutting edge hydraulic drive system, to deliver the next generation in ultra-efficient crop protection.

- Turbomiser spray technology produces a narrow droplet spectrum for excellent coverage
- Hydraulic motors are isolated from the air stream to eliminate oil contamination
- Fans draw air from above the canopy to ensure no ‘sandblasting’ of fruit and eliminate leaf blockages
- High speed fans are engineered for even air distribution and low noise

Since 1962, Silvan Australia has been devoted to those connected to the land. Specialising in viticulture and horticulture sprayers and farm machinery, Silvan has always pioneered superior technology, durability and delivered dedicated support. Silvan and their “Big Red Tanks” have become a constant in the Australian agricultural landscape and more than 50 years later, Silvan are still leaders in the agricultural market and focused on creating a positive and productive future. A leader in the design of high and low volume horticultural sprayers, Silvan has evolved into the largest Australasian manufacturer of world-class crop protection sprayers and related machinery.

The world has changed over the twenty two years since Sphere Foods was founded. Maps are redrawn, communication is instantaneous and deadlines once measured in weeks are now set in hours. Communication and transportation revolutions now allow us to supply any demand anywhere, with a product or service from any part of the globe. A revolution in food-related sciences — agriculture, genetics and more — make it possible to often meet a need by simply modifying a plant or a process.

Winemakers, record keeping need not be a chore

With Wine File...
- Winery records are easy to create and maintain
- Winery records are completely auditable
- Additives can be tracked to the material batch level
- Your HACCP and Standard Operating Procedures are augmented
- Your WSMP record keeping needs are met
- You will be using software that is widely used in Australia, New Zealand and the USA

These are just some of the reasons why Wine File is the winemaker’s choice for winery record keeping.

Contact: t: 02 9807 6077 > sales@winefile.com.au
www.winefile.com.au

Wine File Winery Manager, computer-based winery recordkeeping software that makes regulatory compliance easy. If you are in Australia and want a record keeping tool that makes LIP audits a breeze, Wine File is a proven solution for you. If you are in New Zealand and want a record keeping tool that will meet the requirements of your Wine Standards Management Plan, Wine File is a proven solution for you. Wine File goes beyond being just a tool for regulatory compliance.

The Australian Wine Research Institute (AWRI) is the Australian grape and wine industry’s own research organisation. It supports a sustainable and successful grape and wine industry through world class research, practical solutions and knowledge transfer. Established in 1955, the AWRI is governed by an industry-led, skills-based Board and is a member of the Wine Innovation Cluster at the Waite Research Precinct in Adelaide. AWRI Commercial Services is the commercial arm of the organisation and provides advanced analytical and consulting services on a fee-paying basis.
the glasstop™
The Clear Choice

Join us on stand 1301 to talk to us about our AWRI trial results, the glasstop’s unique authenticity benefits and how to sign up to begin commercial trials.

Thermo Fisher Scientific

Contact: Jaakko McVey  >  t: 03 9790 4101  >  www.thermofisher.com.au

Thermo Fisher Scientific is the world leader in serving science, with more than 50,000 employees in 50 countries. Our mission is to enable our customers to make the world healthier, cleaner and safer. We help our customers accelerate life sciences research, solve complex analytical challenges, improve patient diagnostics and increase laboratory productivity. We offer an unmatched combination of innovative technologies, purchasing convenience and comprehensive support. We are uniquely positioned to combine our unrivalled depth of product, application and service expertise with our extensive range of scientific, healthcare, environmental and industrial process products to provide tailored solutions for each and every customer.
Thinfilm is the global leader in printed electronics and smart packaging systems, enabling the Internet of Everything by connecting everyday items including wines and spirits. We have powered similar functionality for the world’s leading wine and spirits makers, namely, Diageo’s Johnnie Walker “Smart Bottle”, Barbadillo’s Versos 1891 “Smart Bottle”, and Australia’s Ferngrove wines. Thinfilm’s NFC OpenSense smart tags enable winemakers to deliver contextual messages and promotional offers to consumer before and after purchase to drive brand loyalty. OpenSense also provides a means of verifying product authenticity. For more information, please visit www.thinfilm.no.

“Accuracy, efficiency and convenient reporting are three key features for every viticulturalist, and TracMap provides exactly that and is being used widely across Victoria and South Australia” says TracMap’s Jeremy Browne. TracMap is a proven, cloud-based, job management and reporting solution. Using its GPS engine, TracMap makes the logistics of managing multiple vehicles, staff and jobs far easier and more efficient than traditional systems. The ability to plan, schedule, allocate, distribute, monitor, actively manage and report on jobs is a godsend for viticulturalists. “As a number of our clients will testify, they wouldn’t be where they are today without Tracmap”, says Jeremy Browne.

Tubex designs and produces tree shelters to protect and enhance growth of young plants. Tubex tree shelters protect plants from browsing animals and have been specially designed to provide the right solution to your planting needs, offering tree protection solutions in Landscaping, Forestry, Fruit and Viticulture sectors. Products include tree shelters, shrub shelters, plastic mesh tree guards and tree wraps.
Working with industry and government, Veritrack guards against counterfeiting, product diversion and fraud. The VeriTrack™ team are security experts in the design and manufacturing of:

- Brand Protection Labels
- Tamper Evident Tapes
- Tamper Evident Seals
- QR Product Tracking
- Track & Trace Vital Paper Documents
- Security Paper
- Certificates
- Tax Stamps
- Visas Secure Stationery
- MCOs
- Stocks & Bonds
- Taggart Marker Products

Buying wine just got way easier. Never stand in a liquor shop again wondering which of the hundreds or even thousands of wines you’ll take home tonight. We’ve analysed tens of thousands of wines, prices and professional ratings to bring the power of data to that decision. Simply pick up the bottle of wine you’re considering, scan the barcode with Vinloco and we’ll tell you instantly whether that wine is good value or if you should try something else. It’s that easy. All our ratings come from qualified Australian and international wine judges so you can trust our independent assessments. Try the app users tell us changes their wine buying decisions for the better the very first time they use it. Once you do, we don’t think you’ll want to shop for wine ever again without Vinloco.

VINOflux is a photo-chemical process using low level intensity UV at specific wavelengths to trigger the condensation of tannins thereby modifying (softening) the phenolic profile of red wines, this is a physical process performed without the use of any fining agents or other chemicals. The operating system allows for almost infinitely variable treatment times, therefore can be fine-tuned to achieve optimal results for individual wines. VINOflux mimics and simply accelerates a wine’s natural maturation, normal polymerization and development. It reduces a wine’s tannin profile without the use of any fining agents, filtration off lees is not necessary, volume is not lost.
VinPerfect is the pioneer of the oxygen regulating SmartCap for wine. It’s patented technology gives precise and consistent control over post-bottling wine development.

Contact: Craig Hawkyard  >  t: 1707 2522 155  >  chawkyard@vinperfect.com
