XXX

## VERTICAL INCLINATION

Compared to a traditional secateurs, the PX and PXR downward inclination compensates the wrist bending and allows the hand to remain in a neutral position, which reduces the risk of Carpal Tunnel Syndrome.

## LATERAL INCLINATION

Compared to a traditional secateurs, the PX and PXR inclination to the left (for right-handed secateurs) compensates the wrist bending and allows the hand to remain in a neutral position, which improves pressure capacity to be applied on handles and avoids M.S.D. (Musculo Skeletal Disorders).
