

BCL21 COMPACT MANOEUVRABLE SECATEURS

Due to their weight and manoeuvrability these compact secateurs are made for professionals seeking precision and comfort. The comfortable grip and the **Bahco Pradines cutting head**, with a cutting diameter of up to 35 mm, make them particularly suitable for vineyard work. It can also be used for horticulture and maintenance work in parks and gardens.

BAHCO
SERVICES

BAHCO Services

Bahco Services offer each customer guaranteed access to a package of services including a commercial department that provides advice on which tool best suits the job

The Bahco network offers guaranteed local after-sales service/maintenance for Bahco tools to optimise their performance.

Adaptability

- Three different cutting methods for different pruning requirements
- Open the cutting head halfway using the optical trigger to save time when cutting small branches

Cutting head
half-open mode

1 Progressive Fast Cut

Maximum power, maximum speed (21,000 rpm)

2 Progressive Cut

Comfort (16,000 rpm): reduced battery consumption and noise due to lower power use and speed

3 Non-progressive Fast Cut

All or nothing: non-progressive, with half opening

Bahco Pradines cutting head

The cutting offers clean cuts and excellent cutting performance.

The Xylan® coating helps you to easily penetrate the wood, extending the battery life.

Cutting capacity

The compact blade allows clean cuts up to 35 mm, ideal for maximising work speed and for pruning in confined spaces.

Lightweight

These lightweight, very manoeuvrable electric secateurs reduce the strain on elbows and shoulders.

Its comfortable grip fits both left- and right-handed users.

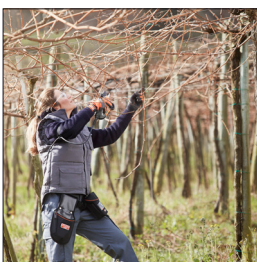

670 g

Brushless motor

A high-performance, engine-optimising battery life that allows intensive work.

Friction free
Carbon free
Maintenance free

2-YEAR WARRANTY

Two-year warranty from the delivery date if the annual maintenance is properly carried out by a certified Bahco repair centre after the first year
