

VARIO Pump Station

MAXIMUM PERFORMANCE EVERY TIME A GUN IS ACTIVATED

The Clean Machine VARIO is an industrial class variable speed Pump Station designed for heavy duty single and multi-user pressure cleaning applications in wineries, food processing and transport industries where there can be one or more users operating at the same time.

The VARIO pump station is typically installed in a plant room along with a gas hot water service and feeds a Ring-Main. A Ring-Main is a reticulated network of plumbed quick release take-off points which delivers high pressure hot water around a winery to exactly where its needed.

VARIO uses the industry leading heavy duty Comet series 4-piston pumps direct coupled to heavy duty 4 pole 3phase electric motors. The pump station handles both cold and hot water applications with temperatures up to 85°C. Cleaning with hot water is always faster, more effective and can increase cleaning efficiency by up to 50%.

The VARIO pump Station delivers maximum performance every time a gun is activated and is built for heavy duty applications where operating times can exceed 6 hours per day.

VARIO Pump Stations can be customized to meet specific

applications like the number of operators, flow and pressure to ensure a lower total cost of ownership.

Features:

- Comet quality pumps with brass pump heads
- 1450 rpm 4 full ceramic pistons and double roller bearings
- Working pressure up to 207 bar
- Water flow up to 120 l/m
- 85°C hot water inlet temperature
- Innovative stainless steel cabinet
- Built on galvanised steel frame
